

2 Day Functional Movement Workshop

A deep dive into understanding how horses move and how to train them for healthy, happy, comfortable longevity.

Using ground work and ridden techniques this workshop will help you and your horse develop a connected partnership with functional balanced movement. Ideal for those with a history of movement issues/injuries although

not exclusive for this as improving movement benefits all and can prevent issues occurring in the future,

The workshop consists of
2x lecture/demo/practical theory sessions
2x ground work sessions
2x ridden sessions

Who is this workshop for?

If you're looking to train your horse using groundwork and ridden exercises with a holistic approach in order to improve movement, joint function and muscle structure through developing balance, suppleness and lightness this is for you.

No quick fixes or gadgets used here just tried and tested method.
